Q5 Based on Sport for Life programs classification which programs are offered by your Sport or Recreation Club/Association/Business/Other? You can select more than one.

Answered: 72 Skipped: 0

Bow Valley True Sport and Recreation Council - Expert Survey

ANSWER CHOICES	RESPONSES	
Awareness and First Involvement: To engage in sport and physical activity, individuals must be aware of what opportunities exist for them, and when they try an activity for the first time, it is critical that the experience is positive. That is why Sport for Life emphasizes the two pre-stages of Awareness and First Involvement.	54.17%	39
Active Start: From 0-6 years, boys and girls need to be engaged in daily active play. Through play and movement, they develop the fundamental movement skills and learn how to link them together. At this stage developmentally appropriate activities will help participants feel competent and comfortable participating in a variety of fun and challenging activities and games.	37.50%	27
FUNdamentals: In the FUNdamentals stage, participants develop fundamental movement skills in structured and unstructured environments for play. The focus is on providing fun, inclusive, multisport, and developmentally appropriate sport and physical activity. These experiences will result in the participant developing a wide range of movement skill along with the confidence and desire to participate.	76.39%	55
Learn to Train: Once a wide range of fundamental movement skills have been acquired, participants progress into the Learn to Train stage, leading to understanding basic rules, tactics, and strategy in games and refinement of sport specific skills. There are opportunities to participate in multiple sports with competitions focused on skill development and retention. Games and activities are inclusive, fun, and skill based. At the end of the Learn to Train stage, participants grow (or progress) towards sport excellence in the Train to Train stage or being Active for Life, either by being Competitive for Life or Fit for Life.	69.44%	50
Train to Compete: Athletes enter the Train to Compete stage when they are proficient in sport-specific Train to Train athlete development components (physical, technical-tactical, mental, and emotional). Athletes are training nearly full-time and competing at the national level while being introduced to international competition.	50.00%	36
Train to Win: Athletes in the Train to Win stage are world class competitors who are competing at the highest level of competition in the world (e.g. Olympics, Paralympics, World Championships, World Cups or top professional leagues). These athletes have highly personalized training and competition plans and have an Integrated Support Team of physical therapists, athletic therapists, and sport psychologists providing ongoing support.	23.61%	17
Active for Life: Individuals who have a desire to be physically active are in the Active for Life stage. A participant may choose to be Competitive for Life or Fit for Life and, if inclined, give back as a sport or physical activity leader. Competitive for Life includes those who compete in any organized sport recreation leagues to Master Games. Fit for Life includes active people who participate in non-competitive physical activity.	75.00%	54
Other (please specify)	6.94%	5
Total Respondents: 72		

Q6 What are the age groups that are covered by your Sport or Recreation Club/Association/Business/Other's programs? You can select more than one.
